Attn.: Mr. Kevin Culbertson

Gentlemen:

I would like to take this opportunity to express my appreciation for the quality of product Smith-Midland provided for the Precast Concrete Building which houses the equipment for the Oliver City Pump Station in the Town of Warrenton, Virginia.

As this pump station is located in an established neighborhood, the Town was concerned that the building would not match the surrounding residential architecture. Your firm provided an excellent building design with a gabled roof which blends with the residential character of the community. Both the Town and the community members are pleased with the completed building.

Again, I would like to extend my thanks to the individuals who assisted in making this project a success.

Sincerely,

Town of Warrenton

Patricia J. Knox
